It's important to keep your automated gate system in good repair for its reliability, safety, and durability. Any equipment is susceptible to breakdown at some time during its working life. That's why Tri-State Fence Company has recently started a new Preventive Maintenance Inspection Program designed to increase the life of your gate operator(s). We strongly recommend that all automated gate operator(s) be maintained on a 6 months basis to make sure that your property is secure at all times. Regular maintenance will also save you money as prevention is always better than expensive and unplanned service calls.

The Preventive Maintenance Inspection Program ensures performance and safety of your equipment and also highlights any minor issues before they escalate. We will conduct a 17 point inspection and maintenance process designed to ensure your equipment performs. Customers protected with the Preventive Maintenance Inspection Program also receive preferred response times.

Our Prevention Maintenance Inspection Program offers our customers 6 month maintenance inspections along with discounted parts and labor rates. It is our goal to make sure your gates are operating as they are designed to.

The Preventive Maintenance Inspection Program will:

- Decrease down time
- Minimize excessive repairs and repair costs
- Increases the longevity of equipment
- Increases safety
- Allow customers to budget for repairs
- Save customers from unexpected costly emergency repairs
- Reward customers for their loyalty with discounts

We look forward to being of service to you! Please call with any questions or to start you Preventive Maintenance Inspection Program.

Pricing is: \$285.00 for one operator per visit
 \$150.00 for each additional operator on site per visit
 \$365.00 for one operator per visit outside fifty miles of TRI-STATE FENCE

Sincerely,

Scott Burnes
